

Architectural Division Profile

Specialized in the manufacturing of high-end architectural work in metal, wood, glass, and plexiglass materials, Carritec creates solutions to best express the customer's unique positioning and style.

Carritec brings unparalleled engineering and manufacturing capabilities to a vast range of innovative product lines by mixing materials, patterns, and finishes, creating unrivalled opportunities for cohesive design.

We provide manufacturing services within a framework that understands and incorporates the end-user's requirements while offering cost-effective manufacturing solutions.

MANUFACTURING EXCELLENCE – Carritec satisfies both the architect's and the designer's requirements in markets as diverse as Transportation, Entertainment, Corporate, Institutional, Hospitality and Retail. We bring products to life by making use of the most current manufacturing practices and cutting-edge equipment, including:

PROJECT MANAGERS – Carritec assigns a Project Manager to each customer to champion that project at weekly production meetings and oversee the schedule from engineering to production as planned. These managers ensure that clients have instant access to information pertaining to their order and that it is given the attention it deserves.

LEAN MANUFACTURING – Carritec operates according to the principles of lean manufacturing, resulting in flexibility, lowered costs, and on-time delivery for our clients.

FINISHING, ASSEMBLY & INTEGRATION – Carritec has a complete in-house coating application facility as well as close partnerships with external specialty coaters. Our extensive assembly expertise includes mechanical and electrical integration.

STATE-OF-THE-ART EQUIPMENT AND FACILITY – Our dynamic, large-scale plant (118,000 square feet) is equipped with the world's finest technology and we use only the highest-quality materials. Our facility is extremely versatile, using every tool available on the market to meet customer expectations, no matter the size or scope of the project.

QUALITY ASSURANCE – Quality is a fundamental part of Carritec Architectural's commitment to excellence. Quality management encompasses every facet of the organization. From management to office and factory personnel, every employee at Carritec understands that quality is not an attribute inspected into a product, but an essential process built into each manufactured product.
